

School Assessment of PNAIS Major Standards and Good Practices Leading to and Maintaining Accreditation

To assess your school's readiness to move from one category to another or to begin the self study, read the following expectations relating to our three categories of affiliation and determine where your school is relative to each expectation in *all three* columns. Please indicate your level of compliance on the line below each expectation using the following symbols:

- + = Currently meeting expectation**
- = Close to meeting expectation**
- 0 = Currently not meeting expectation**

Introductory Statement

PNAIS is committed to helping its schools improve the quality of the educational program they offer their students. For this reason, PNAIS has established major standards as an integral tool for assisting schools with this process. Each Major Standard is accompanied by a set of expectations for each category of PNAIS affiliation. A school seeking to move from one category of affiliation to another should be meeting all of the expectations outlined in its current category and all of the expectations of the category into which they wish to move before gaining that affiliation status. An Accredited Member not meeting all of the Major Standards will be granted a conditional accreditation.

Expectations followed by a parentheses including a GP and number (for example, GP 1) indicates that these expectations are Good Practices in the PNAIS self study manual. An expectation not followed by a GP indicates that the expectation represents an earlier developmental stage of another expectation that is a Good Practice.
